Intellectual property considerations: The Launch Program will work hand-in-hand with the TMCH Requirements to ensure the protection of brand owners and to prevent consumer confusion. Further, Google Registry has also adopted several voluntary supplemental measures for the protection of intellectual property rights, including a permanent Claims Service which will incorporate the “enhanced” claims mechanism, permitting brand owners to continually monitor up to 50 previously abused trademark variants per TMCH entry. Any names registered under Google Registry’s launch program will be subject to this Claims Service.

Launch program SLDs will be internally reviewed to ensure that they promote the goals of the launch program, meet the requirements set forth in the .dad registration policy, and mitigate the possibility that consumers will be confused as to the source or function of a launch program domain.
