

General Registration Policy

This document describes the Registration policy of the TLD “.佛山(xn--1qqw23a)” during the General availability period.

Unless otherwise defined herein, capitalized terms used in this document have the meanings given to them in the ICANN Trademark Clearinghouse Rights Protection Mechanism Requirements available at <http://www.icann.org/en/resources/registries/tmch-requirements> (“TMCH Requirements”).

1. General Registration Commencement

After conclusion of the Sunrise Period and a quiet period, General Registration commences when available domain names in the TLD are open to the general public for registration.

A General Registration application must meet all Registry Policies (including this policy document) and ICANN requirements set out in the Registry Agreement and the Registrar Accreditation Agreement to be considered a valid application.

Valid applications will be allocated on a first-come, first-served basis.

2. Landrush Period

Specific initial registration fees apply to first few weeks of General Registration (known as the “Landrush Period”). During the Landrush Period, interested parties may apply for available domain names in the TLD.

After conclusion of the Landrush Period and a quiet period, available domain names in the TLD are open to the general public for registration at a regular initial registration fee.

Valid applications will be allocated on a first-come, first-served basis.

3. Open Registration Period

After conclusion of the Landrush Period, available domain names in the TLD are open to the general public for registration at initial registration fees set by registrars.

Domain names may be registered for a minimum of one (1) year and a maximum of ten (10) years.

Valid applications will be allocated on a first-come, first-served basis.

4. Trademark Claims Services

As part of the TMCH Requirements, Registry Operator will provide the Claims Services for the first ninety (90) calendar days of General Registration.

The “Claims Services” provide (i) a notice to potential domain name registrants that a domain name they are seeking to register in the TLD matches a Trademark Record (a “Claims Notice”); and (ii) a notification to the Trademark Holder.

A Claims Notice is intended to provide clear notice to the potential domain name registrant of the scope of the Trademark Holder’s rights. Accordingly, during the first 90 days of General Registration, a potential domain name registrant may only complete the domain name registration following acknowledgement of the receipt of a Claims Notice.

5. Registrant Eligibility Requirement

There are no restrictions associated with domain name registration for “.佛山 (xn--1qqw23a)”.

6. Renewal

Domain Names may automatically renew at the end of their term (the expiration date) in accordance with the terms of the Registrant Agreement with the sponsoring Registrar. Renewal pricing to a Registrant is set by the sponsoring Registrar.

7. Contact information

Registrants must provide accurate contact information in accordance with ICANN requirements, as amended from time to time including but not limited to the following: Registrant address and contact information, names and contact information for administrative, technical, and billing contacts. All contact data, except for billing contact data, will be displayed in the WHOIS.

The use of proxy registration data or proxy registration contacts is permitted

consistent with applicable ICANN policy and the Registry's agreements with ICANN, registrars, and the Registry's WHOIS Policy.

8. Transfers

Unless otherwise specifically modified or limited by the Registry in Agreements relating to domain name registrations allocated in the Sunrise Period, certain Premium Domain Names, Registrants are allowed to transfer their second-level domains to the registrar of their choice.

Registrants should contact their registrar of choice to learn about transfer procedures. Registrar-to-registrar transfers are not allowed in the sixty (60) days following the registration of a domain name, unless the Registry expressly waives said sixty (60) day period as allowed by ICANN policies.

Except in the case of bulk transfers of domain names from the sponsoring registrar to a receiving registrar mandated by ICANN, a registrar-to-registrar transfer adds one year to the term of the domain name being transferred, with the one (1) year registration fee charged to the gaining registrar. Registrars may therefore charge the Registrant for the additional domain year. A bulk transfer mandated by ICANN shall not add an additional year to domain names subject thereto, and the gaining registrar shall not be entitled to charge Registrants thereof for an additional domain year.
