3. General conditions and Launch overview

3.1 To register a .scot domain name during Launch, the application must comply with:

- The specific eligibility requirements set forth in this Launch Policy for each launch category, as well as with

- The general eligibility requirements and terms of use set forth in the .scot Registration Policy, hereby incorporated by reference. Specifically, to register and renew a .scot domain name the Registration Policies require that You must be an individual or legal entity with a nexus to the .scot community at the time of registration and thereafter.

Registrations under the .scot TLD are restricted to those fulfilling these two requirements:

a) Nexus with the .scot community. To register and renew a .scot domain name you must be an individual or a legal entity with a nexus to the .scot community. This nexus means that you must be linked to the community at the time of registration and thereafter on a linguistic, cultural, tourism, business basis, or any other activity conducive to the welfare of the worldwide Scottish community.

b) subject to the further requirement that the registrant’s actions in the .scot community, as well as the registrant’s use of the registered domain name, must be:

   (i) generally accepted as legitimate; and
   (ii) beneficial to the cause and values of the worldwide Scottish community; and
   (iii) commensurate with the role and importance of the registered domain name; and
   (iv) in good faith at the time of registration and thereafter.

Registrants are required to state their intended use of the registered domain name. A false statement of intended use is an indication of bad faith and can be the basis for the suspension of the domain name.
Upon registration and during all the life of the .scot domain name You must be able to demonstrate either of the aforementioned fields is applicable to You. Community nexus is subject to post-validation by way of an extensive compliance program based on the same criteria that form the basis of the TLD.

The strength of the validation will be kept in line with the importance of the underlying domain name base on the assumption that an average user would reasonably make in the context of that domain name.

The .scot General Registration Policy will apply to all aspects of Your registration not specifically contemplated in this Launch Policy.

3.2 The Launch Phase for .scot will start on July 15th 2014 and will end on September 13th for Sunrise, September 19th for the Public Interest LRP, and September 16th for all other LRPs.
